How to switch between numbers

You can add up to 5 numbers on your 2talk App, but how to switch between numbers to make a call out using a specific/chosen number?

It's very simple. Follow the quick guide below:

Quick Guide for switching between numbers:

1. Tap on the "Dialpad" button.
2. In the upper left corner, tap on the shown Number > Number's page.
3. Tap on the number to switch it.
4. Tap on "Done".
5. On the Dialpad's page, the number you chose will be shown in the upper left corner.

A screenshot of the 2talk app's Dialpad screen. The screen is dark blue. In the upper left corner, there is a green circle icon followed by the number '16783647159' and a small white icon of a telephone handset with a double-headed arrow.

Now, once you make an outbound call, you will be using the number you just switched. To switch to a different number to make outbound calls, just repeat the steps on the Quick Guide.
