# Polycom Firmware Upgrade for VVX Phones

*Supported Models: Polycom VVX 101/150, 201/250, 301/311/350, 401/411/450, 501 & 601*

This guide explains how to update the firmware of a Polycom IP phone through its web interface. This step is necessary before provisioning the phone to ensure the firmware includes the essential features.

### Upgrade Firmware

To manually upgrade the firmware for your supported Polycom VVX:

Point your browser to **https://<Phone's IP Address>**.

1. Please following steps to grab IP address on your phone:
  1. From Home/Menu, select Settings.
  2. Select Status.
  3. Select Network.
  4. Select TCP/IP Parameters.
2. Enter the password (default is "456").
3. Go to "Utilities" >> "Software Upgrade".

### Software Upgrade

**Phone Details**  
Current software version : 6.1.2.1127
