Configuring Zoiper on a Computer

Zoiper is an open-source portable SIP softphone. It allows you to do high-quality VoIP calls via open SIP protocol.

1. Download **Zoiper** to your computer and open the app after installing it.
2. Insert **username** and **password** and then click on **login**. Your username will be your number followed by **@plus.2talk.com**.
Example: **15084568090@plus.2talk.com**.
The password is your number's password as set by you.

3. You'll need to insert the hostname provider which is **plus.2talk.com** then click **next**.

4. In “Authentication and Outbound proxy” you can click on **skip**.
5. When the possible configurations come up, please choose whichever type of transport it is found and then click **Next**.

After this, the registration process is complete, and you should be able to see your phone registered now.
